

On compressible nonlinearly viscous fluids

Rostislav Vodák

Palacky University Olomouc, Czech Republic

`rostislav.vodak@upol.cz`

In the lecture I would like to give an overview about my results related to the topic which was originally suggested me by my supervisor Ivan Straškraba as a topic for my PhD thesis. The topic and related problems were one of the most important parts of my next scientific research. I would like to introduce the results related to the existence of a solution to respective equations and its various asymptotic properties.
